

Universal Digital Air Control Board

Standardize Your DAF Air Control Today!

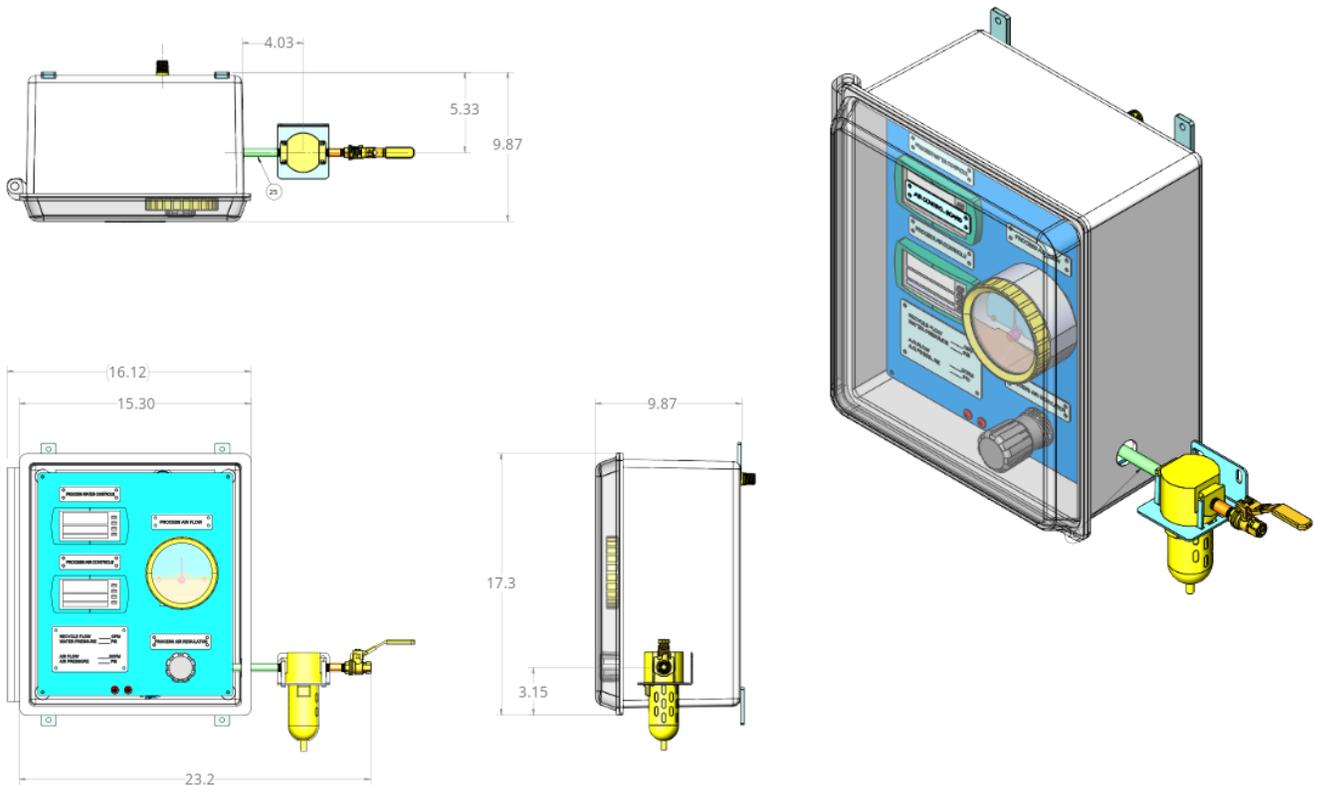

An Easy Upgrade For Your DAF

Plug-and-Play Integration: Works with any DAF system

Improved Process Control: Real-time pressure monitoring (air + water)

Operator-Friendly: Dual digital displays & visual flow indication

Built to Last: SS piping & industrial components

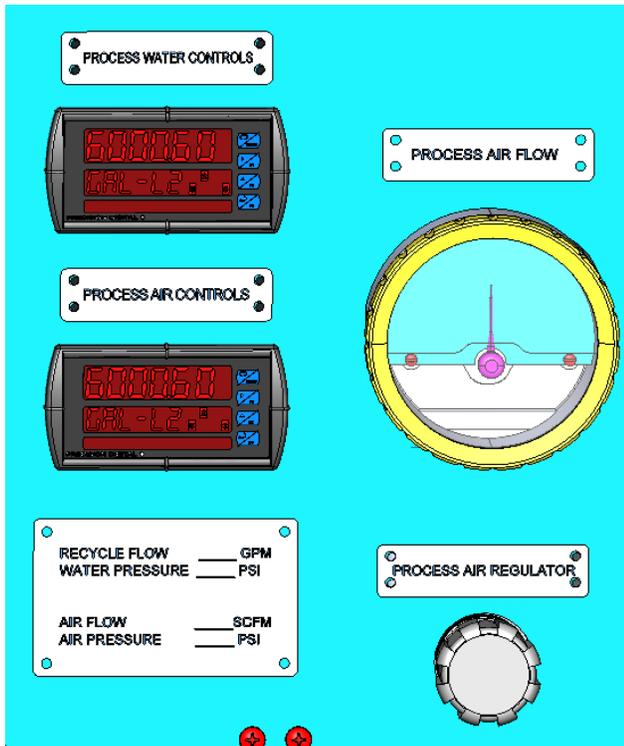

Simple Install:

- 1) Connect compressed air supply
- 2) Connect outlet to DAF air injection
- 3) Provide Power
- 4) Tie into PLC/SCADA

Front of Control Panel

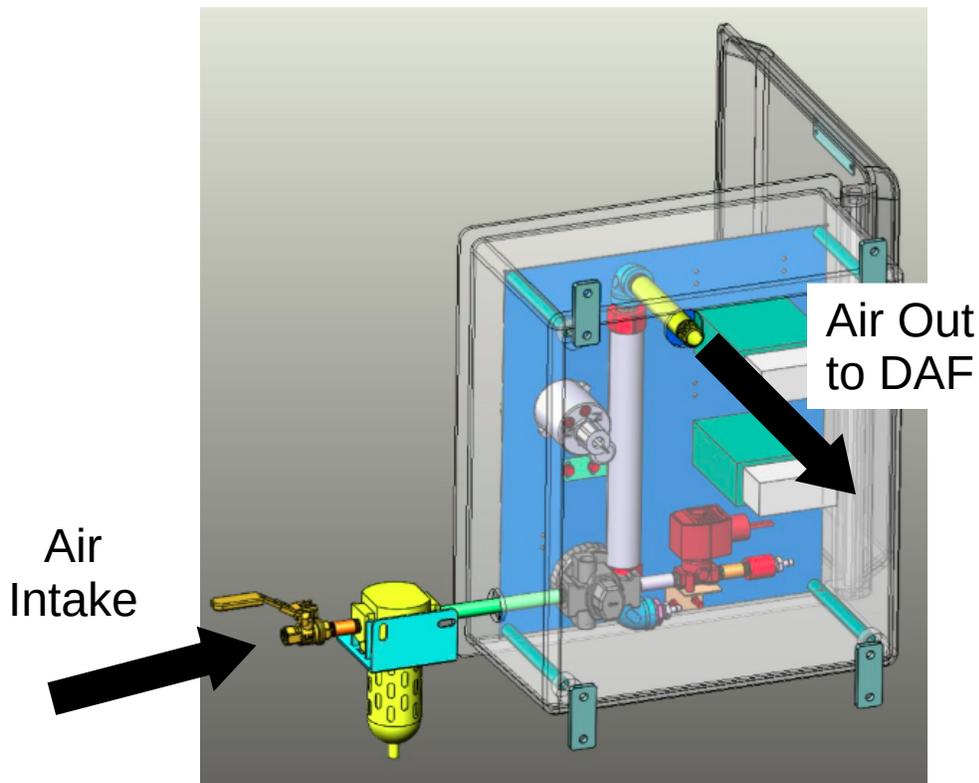

Standardized Air Control for Any DAF System

Gain real-time visibility into air and water pressure and flow with our plug-and-play digital air control solution.

Simply increase visibility, or go even further with our automation experts!

Data Sheet	
Category	Specification
Overall Dimensions (Enclosure)	16.12" L × 9.87" W × 17.13" H
Extended Length (with Air Filter)	23.22" total length (adds 7.1" on selected side)
Air Filter Mounting	Left or right side (pre-configured, one side only)
Enclosure Type	Polycarbonate enclosure with clear snap-on lid
Enclosure Rating	Suitable for industrial/wastewater environments (NEMA-style polycarbonate)
Backplate	Modified internal backplane
Piping & Fittings	Stainless steel (304/304L) pipe, nipples, elbows, and connectors
Valve – Manual	1/4" NPT brass shutoff valve with handle
Valve – Solenoid	2-way, 1/4" NPT normally closed, 120 VAC (ASCO)
Air Filter	1/4" NPT, clear housing with manual drain
Air Regulator	Adjustable, 9–150 PSIG range, ~91 SCFM capacity
Flow Measurement	King Instrument rotameter, 1/2" NPT, stainless steel
Pressure Monitoring	(2) Pressure transmitters (air & water), 4–20 mA output
Digital Displays	(2) Precision Digital multi-process meters
Display Type	Dual-line, 6-digit red LED
Inputs (Meter)	Dual 4–20 mA or ±10 V (field selectable)
Outputs (Meter)	(2) Relay outputs per meter; (1) 4–20 mA analog output
Transmitter Power Supply	24 VDC @ 200 mA (from meter)
Analog Output Power	24 VDC @ 40 mA
Power Requirement	85–265 VAC (or 90–265 VDC capable meters)
Control Signals	4–20 mA compatible for PLC/SCADA integration
Tubing	Internal PEX tubing; external DOT tubing provided
Labels	Stainless steel engraved labels for controls and settings
Mounting	Wall-mounted panel
Operating Temperature	-40 to 149°F (-40 to 65°C)

Additional Options

Left Hand/Right Hand air filter configuration

Modbus communication

Additional I/O or relay expansion

Custom enclosure sizes & features
